Cornwall	
Size	
160m ²	
Installation Date	
November 2008	
Products Utilized	
Stonproof ME7 Stonclad GS Coving Mortar Stontec ERF Vinyl Flake System	

THE STONHARD DIFFERENCE

Stonhard is the world-leading manufacturer and installer of high performance polymer floor and lining systems designed for tough commercial and industrial environments. We deliver long lasting durable products to satisfy the most demanding design specifications and work with you from start to finish. You are protected with a single source warranty on both product and workmanship. Known around the world for excellence, the Stonhard name is synonymous with quality, performance and unmatched service.

Stonproof ME7 - a liquid applied, urethane membrane - is installed onto the prepared floor as a positive moisture barrier and crack bridging isolation layer.

Stonclad GS mortar is used to form the cove profiles allowing a seamless transition and to facilitate cleaning. Vinyl Flakes are then applied onto the coves.

After the vinyl flake has been installed the floor is lightly sanded and two coats of high performance, UV resistant, clear epoxy sealer are applied.
